

SBAR Hand-Off	Current day and time:	Monday 1200				Admission day and time:	Monday 1025						
Situation	Name:	Lisa Rae											
	Age:	78	Sex:	Female	Ethnicity:	Caucasian	Religion:	None specified					
	Provider:	Linda Moore, MD											
	Admission diagnosis:	Hypotension, mechanical fall											
Background	Pertinent medical history:	History of hypertension, falls, and osteoporosis; osteoarthritis in right knee											
	Pertinent social history:	Patient lives in an assisted living facility. Her daughter lives in the area.											
	Allergies:	No known allergies											
	Code status:	Full code											
	Vital signs (most recent):	Time:	1040	T:	98.8 F (37.1 C)	BP:	94/70	P:	84	RR:	18	O ₂ Sat:	93%
	Oxygen therapy:	Mode:	Room air	LPM:	Not applicable								
	Pain:	Rating:	5/10	Most recent pain medication:				0.2 mg hydromorphone IV		Time:	1140		
	Other recent medication:	Patient took 50 mg hydrochlorothiazide, 10 mg alendronate, and 600 mg calcium carbonate at home this morning. Patient reports that she might have inadvertently taken 2 tabs (100 mg) of hydrochlorothiazide.											
	IVs:	Site:	Right antecubital	Type:	18-gauge PIV	Assessment:	Intact, patent	Fluid:	0.9% normal saline IV at 75 mL/hr				
	Drains and tubes:	Site:	None	Type:	Not applicable	Assessment:	Not applicable						
	Wounds:	Site:	Right hip	Type:	Hematoma	Assessment:	Intact, warm, and tender to palpation						
	ADLs:	Diet:	3 g sodium diet				Activity:	Up with moderate assistance and walker					
	Restrictions:	Isolation:	Standard precautions				Fall risk:	Not yet completed					
	Assessments:	Neurologic:	Alert and oriented x 2 (oriented to person and place, disoriented to day/time)										
		Cardiac:	S1, S2 regular rate										
		Respiratory:	Lungs clear throughout										
		GI/GU:	Bowel sounds present in all 4 quadrants; some involuntary urinary incontinence										
		Integumentary:	Ecchymotic area on right hip										
		Ortho/Mobility:	Weak										
		Psychosocial:	Daughter lives in town										
Other:		None											
Labs and diagnostics:	Results from complete blood count and basic metabolic panel are within normal limits.												
Assessment	Nurse's assessment:	Lisa Rae was alert and oriented x 3 in the emergency department. She has been disoriented to time since admission, possibly related to hydromorphone administration. She has complained of grogginess and almost fell trying to get to the bedside commode.											
Recommendation	Plan of care:	Rehydrate with maintenance IV fluids; physical therapy/occupational therapy to evaluate and treat for home safety											
	Tests/results pending:	None											
	Orders pending completion:	None											
	Other:	The nursing admission has been completed. A pressure ulcer risk assessment (Braden Scale) and fall risk assessment (Morse Fall Scale) need to be completed.
