Gathered the necessary equipment and supplies. Selected the correct size and type of gloves. Examined package to ensure that it was intact and dry and had not expired. When in doubt, acquired a new package of sterile gloves. Placed extra sterile gloves in the operating room (OR) or procedure room before beginning the procedure.	☐	☐	☐	
Performed surgical hand antisepsis using surgical hand scrub or alcohol-based hand rub per the manufacturer's instructions for use or per the organization's practice and donned head covering, mask (if applicable), and eye protection or face shield per the organization's practice for a sterile procedure. Inspected the condition of hands and fingernails. Looked for any cuts, lesions, or other breaks in skin integrity. When found, followed the agency's practice for covering an open lesion with a sterile, impervious transparent dressing, as allowed.	☐	☐	☐	
Applied gloves: - Removed the outer wrapper of the glove package. - Grasped the inner glove package, and laid it on a clean, dry, flat surface at waist level. Opened the inner package, kept the gloves on the inside surface of the wrapper. - Identified the right and left glove. - With the thumb and first two fingers of nondominant hand, grasped the glove for dominant hand at the cuff. - Carefully pulled the glove over dominant hand; left it cuffed. Made sure cuff did not roll up around wrist and that fingers were in correct spaces. - With gloved dominant hand, slipped the fingers inside the cuff of the second glove. Did not touch the top surface of the cuff. - Carefully pulled the second glove over nondominant hand. - Interlocked hands above the level of waist.	☐	☐	☐	
Disposed of gloves: - Grasped the outside of one glove cuff with the other gloved hand; avoided touching the skin. - Pulled the glove off, away from self, turned it inside out and placed it in gloved hand. - Tucked thumb or fingers of bare hand inside cuff of remaining glove. Peeled glove off inside out and over the glove just removed. Discarded both gloves in the trash receptacle per agency practice. - Performed thorough hand hygiene.	☐	☐	☐
